Total	92.5%

## Glossary Terms

### Beta

Measures the degree to which a fund's return is affected by movements in the market, represented by the fund's benchmark index. The market is represented as 1.0, so a fund with a beta of 2.0 means that the fund's price moves twice as much as the market, plus or minus the fund's alpha.

### Correlation

A statistical measure of how two securities move in relation to each other. Correlation ranges between -1 and +1. A correlation of -1 equals perfect negative correlation. A correlation of +1 equals perfect positive correlation. If the correlation is 0, the movements of the securities are said to have no correlation; they are completely random. For purposes of this portfolio, portfolio correlation is being measured vs. the DJ Global Moderate Index. Most meaningful with at least 36 months of data.

### Duration

A measure of the sensitivity of the price of a fixed income investment to a change in interest rates. The larger the number duration number, the greater the interest-rate risk or reward for bond prices. Measure expressed as a number of years.

### Sharpe Ratio

The ratio of a fund's excess returns (over the Merrill Lynch 3-Month Treasury Bill index) to its standard deviation. Most meaningful with at least 36 months of data.

### Standard Deviation

Measures the historical volatility of a fund. Funds with higher standard deviation are generally considered to be riskier. Most meaningful with at least 36 months of data.

1 Please refer to the Portfolio prospectus for additional details.

2 The portfolio will use a combination of interest rate derivatives (with a nominal value of approximately 25% of the portfolio's value but may range +/- 5%) backed by cash and cash equivalents to provide additional diversification and balance the sources of risk in the portfolio.

The value of your investment in the Portfolio may be affected by one or more of the following risks, which are described in more detail in "Primary Risks of Investing in the Portfolio" in the Prospectus, any of which could cause the Portfolio's return, the price of the Portfolio's shares or the Portfolio's yield to fluctuate. Please note that there are many other circumstances that could adversely affect your investment and prevent the Portfolio from reaching its objective, which are not described here.

May invest in derivatives to obtain investment exposure, enhance return or protect the Portfolio's assets from unfavorable shifts in the value or rate of underlying investments. Because of their complex nature, some derivatives may not perform as intended, can significantly increase the Portfolio's exposure to the existing risks of the underlying investments and may be illiquid and difficult to value. As a result, the Portfolio may not realize the anticipated benefits from a derivative it holds or it may realize losses. Derivative transactions may create investment leverage, which may increase the volatility and may require liquidation of securities when it may not be advantageous to do so.

Invests in securities of foreign companies and governments, which involves risks not typically associated with U.S. investments, including changes in currency exchange rates; economic, political and social conditions in foreign countries; and governmental regulations and accounting standards different from those in the U.S.

Invests in high yield or "junk" bonds, which are issued by companies that pose a greater risk of not paying the interest, dividends or principal their bonds have promised to pay. Such bonds are especially subject to adverse changes in interest rates or other general market conditions, or to downturns in the issuers' companies or industries.

The Schroders Global Multi-Asset Portfolio is a part of the MetLife risk managed portfolios lineup available through certain MetLife variable products.

If you would like to invest in a risk managed portfolio that is not available at application, you may do so after the variable annuity contract has been issued. See prospectus for details.

Investment performance is not guaranteed. Past performance is no guarantee of future results.

Variable life and annuity products are offered by prospectus only. Prospectuses for variable products issued by a MetLife insurance company, and for the investment portfolios offered thereunder, are available from your financial professional. The contract prospectus contains information about the contract's features, risks, charges and expenses. Investors should consider the investment objectives, risks, charges and expenses of the investment company carefully before investing. The investment objectives, risks and policies of the investment options, as well as other information about the investment options, are described in their respective prospectuses. Please read the prospectuses and consider this information carefully before investing. Product availability and features may vary by state. Please refer to the contract prospectus for more complete details regarding the living and death benefits.

Variable annuities are long-term investments designed for retirement purposes. MetLife variable life insurance and annuity products have limitations, exclusions, charges, and termination provisions and terms for keeping them in force. There is no guarantee that any of the variable investment options in this product will meet their stated goals or objectives. The account or cash value is subject to market fluctuations and investment risk so that, when withdrawn, it may be worth more or less than its original value. All contract and rider guarantees, including optional benefits and any fixed account crediting rates or annuity payout rates, are backed by the claims-paying ability and financial strength of the issuing insurance company. They are not backed by the broker/dealer from which this annuity is purchased, by the insurance agency from which this annuity is purchased or any affiliates of those entities, and none makes any representations or guarantees regarding the claims-paying ability and financial strength of the issuing insurance company. Similarly, the issuing insurance company and the underwriter do not back the financial strength of the broker/dealer or its affiliates. Please contact your financial professional for complete details.

Withdrawals of taxable amounts are subject to ordinary income tax and if made before age 59½, may be subject to a 10% Federal income tax penalty. Some broker/dealers and financial professionals may refer to the 10% Federal income tax penalty as an "additional tax" or "additional income tax," or use the terms interchangeably when discussing withdrawals taken prior to age 59½. Distributions of taxable amounts from a non-qualified annuity may also be subject to the 3.8% Unearned Income Medicare Contribution tax that is generally imposed on interest, dividends, and annuity income if your modified adjusted gross income exceeds the applicable threshold amount. Withdrawals will reduce the living and death benefits and account value. Withdrawals may be subject to withdrawal charges.

The investment objectives and policies of the portfolios may be similar to those of other portfolios managed by the same investment advisor. No representation is made, and there can be no assurance given, that the portfolios' investment results will be comparable to the investment results of any other portfolio, including other portfolios with the same advisor or manager. The portfolios' investment results may be expected to differ, and may be higher or lower than the investment results of such other portfolios. Differences in portfolio size, investments held, contract and portfolio expenses, and other factors are all expected to contribute to the differences in performance.

Variable annuities are issued by Metropolitan Life Insurance Company on Policy Form PPS (07/01). Equity Advantage Variable Universal Life is issued by Metropolitan Life Insurance Company on Policy Form IE-46-06-NY-1.

All variable products are distributed by MetLife Investors Distribution Company (member FINRA). All are MetLife companies.

Metropolitan Life Insurance Company, 200 Park Avenue, New York, NY 10166. MetLife Investors Distribution Company, at 1095 Avenue of the Americas, New York, NY 10036. The information illustrated above has been provided by the fund company and deemed to be reliable.
