

Fidelity VIP Money Market Portfolio

Investment Objective

The investment seeks as high a level of current income as is consistent with preservation of capital and liquidity. The fund normally invests in U.S. dollar-denominated money market securities of domestic and foreign issuers and repurchase agreements. It potentially enters into reverse repurchase agreements. The fund invests more than 25% of total assets in the financial services industries. It invests in compliance with industry-standard regulatory requirements for money market funds for the quality, maturity, and diversification of investments.

About Risk

An investment in a money market fund is not insured or guaranteed by the U.S. government, or any bank, and there is no assurance that the fund will maintain a stable net asset value of \$1.00 per share.

Fidelity VIP Money Market Portfolio

Glossary of Terms

P/E Ratio Price-to-earnings ratio is the valuation of a company's current share price compared to its per-share earnings over the most recent 12-month period.

P/B Ratio Price-to-book ratio is calculated by dividing the current share price of a stock by its latest quarter's book value per share. Book value is total assets minus intangible assets and liabilities.

Market Cap Calculated by multiplying the market price per share of a company by the number of shares outstanding. Companies are usually grouped into micro, small, mid and large "caps."

Alpha Measures the portion of a fund's return that is unrelated to movements in the benchmark. It is calculated over the most recent 36 months of data.

Beta Measures the degree to which a fund's return is affected by movements in the market, represented

by the fund's benchmark index. The market is represented as 1.0, so a fund with a beta of 2.0 means that the fund's price moves twice as much as the market, plus or minus the fund's alpha.

R-Squared Measures the proportion of a fund's performance that is related to its benchmark index. For example, a large-cap equity fund with an R² of 86 that is benchmarked to the S&P 500 Index indicates that 86% of the fund's historical behavior can be attributed to movements in the S&P 500.

Sharpe Ratio The ratio of a fund's excess returns (over the Merrill Lynch 3-Month Treasury Bill index) to its standard deviation. Measured over a 36-month period.

Standard Deviation Measures the historical volatility of a fund. Funds with higher standard deviation are generally considered to be riskier.

Duration Measures the price responsiveness of interest-sensitive assets to changes in the market

interest rates, as reported by the fund, stated in years. Funds with a higher average duration typically experience greater price changes when interest rates change.

Maturity The average number of years to maturity of the bonds in a fund.

Credit Quality Measure of a bond's or bond portfolio's credit worthiness, based on risk of default, as determined by independent ratings agencies.

Coupon The stated interest rate of a bond, typically paid every six months. A \$1,000 bond with a coupon of 6% will pay \$60 in interest annually. The coupon may or may not represent the actual expected return on the bond.

SEC Yield Standard yield calculation for bond funds developed by the Securities and Exchange Commission (SEC) that is based on the most recent 30-day period covered by the fund's filings with the SEC. Reflects dividends and interest earned, less fund expenses, during that period.

Disclosures

Investment performance is not guaranteed. Past performance is no guarantee of future results.

Prospectuses for variable products issued by a MetLife insurance company, and for the investment portfolios offered thereunder, are available from your financial professional. The contract prospectus contains information about the contract's features, risks, charges and expenses. Investors should consider the investment objectives, risks, charges and expenses of the investment company carefully before investing. The investment objectives, risks and policies of the investment options, as well as other information about the investment options, are described in their respective prospectuses. Please read the prospectuses and consider this information carefully before investing. Product availability and features may vary by state. Please refer to the contract prospectus for details regarding the living and death benefits.

Variable annuities are long-term investments designed for retirement purposes. MetLife Variable life insurance and annuity products have limitations, exclusions, charges, termination provisions and terms for keeping them in force. There is no guarantee that any of the variable investments options in this product will meet their slated goals or objectives. The account or cash value is subject to market fluctuations and investment risk so that, when withdrawn, it may be worth more or less than its original value. All contract and rider guarantees, including optional benefits and any fixed account crediting rates or annuity payout rates, are backed by the claims-paying ability and financial strength of a MetLife insurance company. They are not backed by the broker/dealer from which this annuity is purchased, by the insurance agency from which this annuity is purchased or any affiliates of those entities, and none makes any representations or guarantees regarding the claims-paying ability and financial strength of a MetLife insurance company. Similarly, MetLife insurance companies and the underwriter do not back the claims-paying ability and financial strength of the broker/dealer or its affiliates. Please contact your financial professional for complete details.

The U.S. Treasury Bill 3-Month Auction Average measures the average yield of 3-month U.S. Treasury bills, based on the results of the most recent Treasury auctions.
