

## Instructions for linking to the eForms website or using eForms services:

### Linking to the eForms website or using eForms Services:

To use eForms as a Service or to call the eForms website from another application, you must engage eForms prior to linkage, as there are sign-on or coding issues that may have to be addressed. Please send a note to the eForms mailbox ([eforms@metlife.com](mailto:eforms@metlife.com)) and request a meeting to discuss the options.

### Examples of services may include:

- eForms services which allow client Web applications to submit a form search request to eForms, and returns search results. Depends on the requirement need, eForms can either transfer results back to the requesting Web application, or redirect user from the requesting site to eForms result page, where user can utilize eForms functionality to perform actions (view, print, email, fax) on the actual forms.
- eForms PDF assembler service that receives inbound service request and returns resultant merged PDF.
- Direct access to any line of business search page. The user is able to use full eForms functionality.
