Benchmark for this fund is BBgBarc US Agg Bond TR USD. \*Source: Wilshire Compass

## About Risk

Bond prices may change in response to many factors, including changes to market interest rates, inflation, changes to the credit worthiness of the issuer, liquidity concerns, and investor perception. Investments in bond funds are not guaranteed, and may lose value at any time.

## Glossary of Terms

**Alpha** Measures the portion of a fund's return that is unrelated to movements in the benchmark. It is calculated over the most recent 36 months of data.

**Beta** Measures the degree to which a fund's return is affected by movements in the market, represented by the fund's benchmark index. The market is represented as 1.0, so a fund with a beta of 2.0 means that the fund's price moves twice as much as the market, plus or minus the fund's alpha.

**Coupon** The stated interest rate of a bond, typically paid every six months. A \$1,000 bond with a coupon of 6% will pay \$60 in interest annually. The coupon may or may not represent the actual expected return on the bond.

**Duration** Measures the price responsiveness of interest-sensitive assets to changes in the market interest rates, as reported by the fund, stated in years. Funds with a higher average duration typically experience greater price changes when interest rates change.

**Maturity** The average number of years to maturity of the bonds in a fund. Credit Quality Measure of a bond's or bond portfolio's credit worthiness, based on risk of default, as determined by independent ratings agencies.

**R-Squared** Measures the proportion of a fund's performance that is related to its benchmark index. For example, a large-cap equity fund with an

R<sup>2</sup> of 86 that is benchmarked to the S&P 500 Index indicates that 86% of the fund's historical behavior can be attributed to movements in the S&P 500.

**Sharpe Ratio** The ratio of a fund's excess returns to its standard deviation. Measured over a 36-month period.

**Standard Deviation** Measures the historical volatility of a fund. Funds with higher standard deviation are generally considered to be riskier.

**Yield-to-Maturity (YTM)** reflects the internal annual rate of return an investor would realize by purchasing a bond, holding it to maturity, and reinvesting all coupon interest received at the same YTM.

Investment performance is not guaranteed. Past performance is no guarantee of future results.

Variable life and annuity products are offered by prospectus only. Prospectuses for variable products issued by a MetLife insurance company, and for the investment portfolios offered thereunder, are available from your financial professional. The contract prospectus contains information about the contract's features, risks, charges and expenses. Investors should consider the investment objectives, risks, charges and expenses of the investment company carefully before investing. The investment objectives, risks and policies of the investment options, as well as other information about the investment options, are described in their respective prospectuses. Please read the prospectuses and consider this information carefully before investing. Product availability and features may vary by state. Please refer to the contract prospectus for details regarding the living and death benefits.

Variable annuities are long-term investments designed for retirement purposes. MetLife Variable life insurance and annuity products have limitations, exclusions, charges, termination provisions and terms for keeping them in force. There is no guarantee that any of the variable investments options in this product will meet their stated goals or objectives. The account or cash value is subject to market fluctuations and investment risk so that, when withdrawn, it may be worth more or less than its original value. All contract and rider guarantees, including optional benefits and any fixed account crediting rates or annuity payout rates, are backed by the claims-paying ability and financial strength of the issuing insurance company. They are not backed by the broker/dealer from which this annuity is purchased, by the insurance agency from which this annuity is purchased or any affiliates of those entities, and none makes any representations or guarantees regarding the claims-paying ability and financial strength of the issuing insurance company. Similarly, the issuing insurance company and the under-writer does not back the claims-paying ability and financial strength of the broker/dealer or its affiliates. Please contact your financial professional for complete details.

The Bloomberg Barclays U.S. Aggregate Bond Index measures the performance of the broad U.S. bond market and is composed of fixed-income securities rated investment grade (BBB- or higher or its equivalent), including U.S. government, corporate, and sovereign debt, and mortgage-backed and asset-backed securities. All index information which is credited marked or entitled 'Barclays' is ©Copyright Barclays Capital 2016. All Rights Reserved; Unpublished; PROPRIETARY TO BARCLAYS CAPITAL INCORPORATED

The investment objectives and policies of the portfolios may be similar to those of other portfolios managed by the same investment advisor. No representation is made, and there can be no assurance given, that the portfolios' investment results will be comparable to the investment results of any other portfolio, including other portfolios with the same advisor or manager. The portfolios' investment results may be expected to differ, and may be higher or lower than the investment results of such other portfolios. Differences in portfolio size, investments held, contract and portfolio expenses, and other factors are all expected to contribute to the differences in performance.

Variable life and annuity products are issued by Metropolitan Life Insurance Company, New York, NY 10166 and Metropolitan Tower Life Insurance Company, Lincoln, Nebraska 68516, and distributed by MetLife Investors Distribution Company (member FINRA), New York, NY 10166. All are MetLife companies.
