**Variable Investment Option Performance Update**

The performance data quoted represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance data quoted. Performance current to the most recent month-end may be viewed at www.metlife.com. The account balance is subject to market fluctuations and investment risk so that, when withdrawn, it may be worth more or less than its original value. For Investment Divisions that invest in Portfolios of the underlying Trust that were in existence prior to the Investment Division inception date, these returns have been adjusted to reflect the charges and expenses of the Preference Plus Account Variable Annuity, as if the contract had existed during the stated period(s), including all Portfolio-level expenses and the Separate Account Charge of 1.25%. These results do not reflect the withdrawal charges which begin at 7% and decrease over 7 years (for returns reflecting these charges, see the Standardized report pages in this document that follows this Nonstandardized report). These figures represent past performance and are not an indication of future performance.

A MetLife investment option may have a name and/or investment objective similar to that of another mutual fund with the same manager. Despite any similarity, the MetLife option is separate and distinct and will not have the same performance. Different performance will result from different investment policies, cash flows, fees, expenses and fund asset sizes.

The performance shown may reflect, for some periods described, the management of previous investment managers. Please see the prospectus for more information.

A fee waiver or expense limit may be or have been in place for any of the investment options. The reduced expenses that may result from this waiver or limit may increase performance results. Please see the prospectus for more information.

Certain investment options may have adopted, with respect to certain classes, a distribution plan under Rule 12b-1 of the Investment Company Act of 1940. MetLife is paid the 12b-1 fee under the plan. Please see the prospectus for more information.

While diversification through an asset allocation strategy is a useful technique that can help to manage overall portfolio risk and volatility, there is no certainty or assurance that a diversified portfolio will enhance overall return or outperform one that is not diversified. An investment made according to one of these asset allocation models neither guarantees a profit nor prevents the possibility of loss.

Asset allocation portfolios are “funds of funds” portfolios. Because of this two-tier structure, each asset allocation portfolio bears its own investment management fee and expenses as well as its pro rata share of the management fee and expenses of the underlying portfolios. The Contract Owner may be able to realize lower aggregate expenses by investing directly in the underlying portfolios instead of investing in an asset allocation portfolio. In that case, you would not receive the asset allocation services provided by an investment adviser.

**Investment Performance Is Not Guaranteed.**
Prospectuses for the Preference Plus Account variable annuity issued by Metropolitan Life Insurance Company and for the investment portfolios are available from your financial professional or at www.metlife.com. The contract prospectus contains information about the contract’s features, risks, charges and expenses. The investment objectives, risks and policies of the investment options, as well as other information about the investment options, are described in their respective prospectuses. Investors should consider the investment objectives, risks, charges and expenses of the investment company carefully before investing. Please read the prospectuses and consider this information carefully before investing. Product availability and features may vary by state. Please refer to the contract prospectus for more complete details regarding the living and death benefits.

Variable annuities are long-term investments designed for retirement purposes. Variable annuities have limitations, exclusions, charges, termination provisions and terms for keeping them in force. There is no guarantee that any of the variable investment options in this product will meet its stated goals or objectives. The account value is subject to market fluctuations and investment risk so that, when withdrawn, it may be worth more or less than its original value. All product guarantees, including optional benefits, are subject to the claims-paying ability and financial strength of the issuing insurance company. Please contact your financial professional for complete details.

Distributions of 401(k), 403(b) or 457(b) salary reduction contributions allocated to your account, and the earnings on such contributions, are generally not permitted prior to attaining normal retirement age under your retirement plan except under certain situations, such as your severance from employment with the employer sponsoring the plan or your death, disability or hardship (or 457(b) unforeseeable emergency) as provided under the plan. Distributions of contributions and earnings may also be restricted as defined in the plan documents. Contact your plan administrator to determine when and under what circumstances you may request a distribution from your plan. Where permitted, distributions of taxable amounts are generally subject to ordinary income tax and, if made before age 59½, may be subject to a 10% federal income tax penalty. In the case of 457(b) governmental plans, there is no 10% federal income tax penalty except that the 10% federal income tax penalty may apply to distributions of amounts previously rolled over to a governmental 457(b) plan from another type of employer retirement plan or IRA. Consult your tax advisor to determine if an exception to the 10% federal income tax penalty may apply.

The performance data quoted represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance data quoted. Performance current to the most recent month-end may be viewed at www.metlife.com. The account balance is subject to market fluctuations and investment risk so that, when withdrawn, it may be worth more or less than its original value. Each Investment Option consists of an investment division of the separate account supporting the contract (an "Investment Division") that invests solely in units of a fund portfolio (a "Portfolio"). *Standardized Performance for an Investment Option, as defined by the SEC, is the Average Annual Total Return for periods commencing no earlier than the Investment Division inception date and terminating at the end of the most recent calendar quarter. Average Annual Total Returns shown that include periods prior to the Investment Division inception date are Non-Standardized Performance. Charges for Standardized Performance include all Portfolio-level expenses and the Separate Account Charge of 1.25% and the maximum applicable withdrawal charge of 7%. Past performance does not guarantee future results.

While diversification through an asset allocation strategy is a useful technique that can help to manage overall portfolio risk and volatility, there is no certainty or assurance that a diversified portfolio will enhance overall return or outperform one that is not diversified. An investment made according to one of these asset allocation models neither guarantees a profit nor prevents the possibility of loss.

Asset allocation portfolios are "fund of funds" portfolios. Because of this two-tier structure, each asset allocation portfolio bears its own investment management fee and expenses as well as its pro rata share of the management fee and expenses of the underlying portfolios. The Contract Owner may be able to realize lower aggregate expenses by investing directly in the underlying portfolios instead of investing in an asset allocation portfolio. In that case, you would not receive the asset allocation services provided by an investment adviser.

Investment Performance Is Not Guaranteed.

Prospectuses for the Preference Plus Account variable annuity issued by Metropolitan Life Insurance Company and for the investment portfolios are available from your financial professional or at www.metlife.com. The contract prospectus contains information about the contract’s features, risks, charges and expenses. The investment objectives, risks and policies of the investment options, as well as other information about the investment options, are described in their respective prospectuses. Investors should consider the investment objectives, risks, charges and expenses of the investment company carefully before investing. Please read the prospectuses and consider this information carefully before investing. Product availability and features may vary by state. Please refer to the contract prospectus for more complete details regarding the living and death benefits.

Variable annuities are long-term investments designed for retirement purposes. Variable annuities have limitations, exclusions, charges, termination provisions and terms for keeping them in force. There is no guarantee that any of the variable investment options in this product will meet its stated goals or objectives. The account value is subject to market fluctuations and investment risk so that, when withdrawn, it may be worth more or less than its original value. All product guarantees, including optional benefits, are subject to the claims-paying ability and financial strength of the issuing insurance company. Please contact your financial professional for complete details.

Distributions of 401(k), 403(b) or 457(b) salary reduction contributions allocated to your account, and the earnings on such contributions, are generally not permitted prior to attaining normal retirement age under your retirement plan except under certain situations, such as your severance from employment with the employer sponsoring the plan or your death, disability or hardship (or 457(b) unforeseeable emergency) as provided under the plan. Distributions of contributions and earnings may also be restricted as defined in the plan documents. Contact your plan administrator to determine when and under what circumstances you may request a distribution from your plan. Where permitted, distributions of taxable amounts are generally subject to ordinary income tax and, if made before age 59½, may be subject to a 10% federal income tax penalty. In the case of 457(b) governmental plans, there is no 10% federal income tax penalty except that the 10% federal income tax penalty may apply to distributions of amounts previously rolled over to a governmental 457(b) plan from another type of employer retirement plan or IRA. Consult your tax advisor to determine if an exception to the 10% federal income tax penalty may apply.
