Variable Investment Option Performance Update

The performance data quoted represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance figures quoted. The investment return and principal value of an investment will fluctuate and an investor's shares, when redeemed, may be worth more or less than their original cost. For Investment Divisions that invest in Portfolios of the underlying Trust that were in existence prior to the Investment Division inception date, these returns have been adjusted to reflect the charges and expenses of the MetLife Financial Freedom Select B Class Variable Annuity, as if the contract had existed during the stated period(s), including all Portfolio-level expenses, the Separate Account Charge of 1.15% (the Separate Account Charge includes an additional charge of 0.25% as a percentage of your average Account Balance in the American Funds Bond, American Funds Growth, American Funds Growth-Income and American Funds Global Small Capitalization Investment Divisions), and the annual Account Fee of \$30⁺. These results do not reflect the withdrawal charges which begin at 9% and decrease over 12 years (for returns reflecting these charges, see the Standardized report pages in this document that follows this Nonstandardized report). **These figures represent past performance and are not an indication of future performance.**

A MetLife investment option may have a name and/or investment objective similar to that of another mutual fund with the same manager. Despite any similarity, the MetLife option is separate and distinct and will not have the same performance. Different performance will result from different investment policies, cash flows, fees, expenses and fund asset sizes.

Certain investment options may have adopted, with respect to certain classes, a distribution plan under Rule 12b-1 of the Investment Company Act of 1940. MetLife is paid the 12b-1 fee under the plan. Please see the prospectus for more information.

While diversification through an asset allocation strategy is a useful technique that can help to manage overall portfolio risk and volatility, there is no certainty or assurance that a diversified portfolio will enhance overall return or outperform one that is not diversified. An investment made according to one of these asset allocation models neither guarantees a profit nor prevents the possibility of loss.

Asset allocation portfolios are "fund of funds" portfolios. Because of this two-tier structure, each asset allocation portfolio bears its own investment management fee and expenses as well as its pro rata share of the management fee and expenses of the underlying portfolios. The Contract Owner may be able to realize lower aggregate expenses by investing directly in the underlying portfolios instead of investing in an asset allocation portfolio. In that case, you would not receive the asset allocation services provided by an investment adviser.

Investment Performance Is Not Guaranteed.

Additional prospectuses for the MetLife Financial Freedom Select variable annuity issued by Metropolitan Life Insurance Company and for the investment portfolios are available from your financial professional or at www.metlife.com. The contract prospectus contains information about the contract's features, risks, charges and expenses. Investors should consider the investment objectives, contract features, risks charges and expenses of the investment company carefully before investing. The investment objectives, risks and policies of the investment options, as well as other information about the investment options, are described in their respective prospectuses. Please read the prospectuses and consider this information carefully before investing. Product availability and features may vary by state. Please refer to the contract prospectus for more complete details regarding the living and death benefits.

Variable annuities are long-term investments designed for retirement purposes. Variable annuities have limitations, exclusions, charges, termination provisions and terms for keeping them in force. There is no guarantee that any of the variable investment options in this product will meet its stated goals or objectives. The account value is subject to market fluctuations and investment risk so that, when withdrawn, it may be worth more or less than its original value. All product guarantees, including optional benefits, are subject to the claims-paying ability and financial strength of the issuing insurance company. Please contact your financial professional for complete details.

Distributions of 401(k), 403(b) or 457(b) salary reduction contributions allocated to your annuity account, and the earnings on such contributions, are generally not permitted prior to attaining normal retirement age under your retirement plan except under certain situations, such as your severance from employment with the employer sponsoring the plan or your death, disability or hardship as provided under the plan. Distributions of contributions and earnings may also be restricted as defined in the plan documents. Contact your plan administrator to determine when and under what circumstances you may request a distribution from your plan. Where permitted, distributions of taxable amounts are generally subject to ordinary income tax and, if made before age 59½, may be subject to a 10% federal income tax penalty. In the case of 457(b) governmental plans, the 10% federal income tax penalty may apply to amounts rolled over from another type of qualified retirement plan or IRA. Because the purchase of a variable annuity through an employer retirement plan does not provide additional tax-deferral benefits beyond those already provided through the retirement plan, you should consider the variable annuity for its death benefit, annuity options and other non-tax related benefits. Distributions will reduce the living and death benefits and account value and may be subject to withdrawal charges.

Variable annuities are long-term investments designed for retirement purposes. Variable annuities have limitations, exclusions, charges, termination provisions and terms for keeping them in force. There is no guarantee that any of the variable investment options in this product will meet its stated goals or objectives. The account value is subject to market fluctuations and investment risk so that, when withdrawn, it may be worth more or less than its original value. All product guarantees, including optional benefits, are subject to the claims-paying ability and financial strength of the issuing insurance company. Please contact your financial professional for complete details.

Distributions of 401(k), 403(b) or 457(b) salary reduction contributions allocated to your annuity account, and the earnings on such contributions, are generally not permitted prior to attaining normal retirement age under your retirement plan except under certain situations, such as your severance from employment with the employer sponsoring the plan or your death, disability or hardship as provided under the plan. Distributions of contributions and earnings may also be restricted as defined in the plan documents. Contact your plan administrator to determine when and under what circumstances you may request a distribution from your plan. Where permitted, distributions of taxable amounts are generally subject to ordinary income tax and, if made before age 59½, may be subject to a 10% federal income tax penalty. In the case of 457(b) governmental plans, the 10% federal income tax penalty may apply to amounts rolled over from another type of qualified retirement plan or IRA. Because the purchase of a variable annuity through an employer retirement plan does not provide additional tax-deferral benefits beyond those already provided through the retirement plan, you should consider the variable annuity for its death benefit, annuity options and other non-tax related benefits. Distributions will reduce the living and death benefits and account value and may be subject to withdrawal charges.
