The performance data quoted represents past performance and does not guarantee future results. Current performance may be lower or higher than the performance figures quoted. The investment return and principal value of an investment will fluctuate and an investor's shares, when redeemed, may be worth more or less than their original cost. For Investment Divisions that invest in Portfolios of the underlying Trust that were in existence prior to the Investment Division inception date, these returns have been adjusted to reflect the charges and expenses of the Preference Plus Select Bonus Class Variable Annuity, as if the contract had existed during the stated period(s), including all Portfolio-level expenses, the Separate Account Charge of 1.70% (the Separate Account Charge includes an additional 0.25% on the American Funds Bond, American Funds Growth-Income, American Funds Growth and American Funds Global Small Capitalization Investment Divisions), and the annual Account Fee of \$30†. These results do not reflect the withdrawal charges which begin at 9% and decrease over 7 years (for returns reflecting these charges, see the Standardized report pages in this document that follows this Nonstandardized report). These results do not reflect the bonus credit applicable to this series of contract. **These figures represent past performance and are not an indication of future performance.**

While diversification through an asset allocation strategy is a useful technique that can help to manage overall portfolio risk and volatility, there is no certainty or assurance that a diversified portfolio will enhance overall return or outperform one that is not diversified. An investment made according to one of these asset allocation models neither guarantees a profit nor prevents the possibility of loss.

Asset allocation portfolios are "fund of funds" portfolios. Because of this two-tier structure, each asset allocation portfolio bears its own investment management fee and expenses as well as its pro rata share of the management fee and expenses of the underlying portfolios. The Contract Owner may be able to realize lower aggregate expenses by investing directly in the underlying portfolios instead of investing in an asset allocation portfolio. In that case, you would not receive the asset allocation services provided by an investment adviser.

Investment Performance Is Not Guaranteed.
