Fees and/or expense reimbursement arrangements are currently in effect or may have been in effect for certain funds. These fee waivers and expense reimbursements have the effect of increasing performance results.

Prospectuses for the underlying investment funds are available from Metropolitan Life Insurance Company. The prospectuses contain information about the investment objectives, risks, and policies of the underlying investment funds, as well as other information about the underlying funding choices. Please read the prospectuses and consider this information carefully before investing. Product availability and features may vary by state. All product guarantees are subject to the financial strength and claims-paying ability of the issuing insurance company.

The average annual total returns shown above represent past performance and are not an indication of future performance. Past performance does not guarantee future results. Current performance may be lower or higher than the performance information shown. The investment experience and cash value of a policy will fluctuate so that, at the time of a withdrawal or surrender, the cash value may be worth more or less than the amount of premiums paid.

The Equity Advantage VUL contracts were first offered on September 19, 1998. Performance assumes the Equity Advantage VUL contract was in existence for the period shown. These rates reflect fund management fees and direct fund expenses. The rates do not reflect the policy's sale charge, mortality and expense risk charge, administrative charge and cost of insurance charge and surrender charge. If these charges were included, the performance results would be significantly lower. You may ask your registered Representative for a personalized illustration based on historical rates of return that will show the effect of these policy charges. You may also request a personalized illustration that will show the effect of these charges at an assumed rate of return

A Portfolio may have a name and/or objective that is very similar to that of a publicly available mutual fund that is managed by the same money manager. These Portfolios are not publicly available and will not have the same performance as those publicly available mutual funds. Different performance will result from differences in implementation of investment policies, cashflows, fees and size of the Portfolio.
